In the Specification

Please note that page and line numbers referred to herein refer to the clean version of the substitute specification as submitted on January 27, 2006.

Please amend the paragraphs that appear at page 5, lines 6 to 11, as follows:

Figure 1 is a diagram showing how computing device memory resources are accessed in accordance with an embodiment of the present invention; [[and]]

Figure 2 is a diagram showing how the computing device memory resources can be partitioned in accordance with an alternative embodiment of the present invention; and [[.]]

At page 5, between lines 11 and 12, please insert the following:

--Figure 3 illustrates the organization of the Block Replacement Section in accordance with the claimed invention.--

Please amend the paragraph that appears on page 14, lines 27 to 31, as follows:

Additionally, the GBBM software requires a transfer block which is located below the unlocked block replacement tables. Hence, the size of the reservoir is preferably set to be equal to the size of the Block Replacement Section minus five blocks. Therefore, the Block Replacement Section may be organized as illustrated in Figure 3. ~~as follows:-~~

Please delete the drawing that appears at the top of page 15.
